

**The race is always won in the corners.**  
The new BR 35/12 C scrubber drier.

## Turn into a winner.

It has never been easier to manoeuvre around obstacles when cleaning. The new BR 35/12 C with KART – Kärcher Advanced Response Technology – has turned cleaning into driving pleasure. With its car-like steering and light weight, the BR 35/12 C is an extremely agile and mobile machine, which requires minimal physical effort from the operator. The roller brush head, which can pivot 200° in both directions, makes cleaning even in tight corners more productive and more fun. It's time to take the wheel.

## Extremely agile and mobile.

Thanks to the innovative KART (Kärcher Advanced Response Technology) steering concept, the BR 35/12 C can clean right up to edges and be driven away from walls at any angle. When it gets into a corner or tight spot, the machine can simply be steered out again, whilst continuing to scrub and dry the floor. The height-adjustable steering wheel allows operators of any size to set their ideal working position. The folding steering column makes it easy to secure for transport, which is made even easier thanks to the machine's built-in tie-down points.

The roller brush head of the new BR 35/12 C is an outstanding technical innovation: It can be rotated up to 200°. The floor is scrubbed and dried regardless of the position of the steering wheel.

This means that every part of the full circle is covered, finally eliminating missed spots when cleaning, and leaving the whole floor completely dry. In the parking position, all pressure is taken off the brushes to prevent any damage.

#### 1 Built-in pre-sweep speeds up floor preparation

Thanks to the sweeping function of the BR 35/12 C, precautionary measures can now be dispensed with. The integrated sweep bin collects smaller objects such as stones, scraps, leaves and wood chips, and prevents them from blocking the suction bar.

#### 2 Faster, longer, lighter

The brand new high-performance battery for the BR 35/12 C is extremely light. The resulting low weight of the machine noticeably improves handling and mobility, especially on staircases. The quick charging times (50 % = 1 h, 100 % = 3 h), the ability to partially charge the battery without losing capacity and a life span that is three times longer (in comparison to conventional batteries) help you to carry out your work efficiently and safeguard your investment in the machine.

#### 3 Luxurious operating comfort

The steering wheel of the new BR 35/12 C does not only provide a completely new driving experience; it also serves as the central information hub. It houses the main operating controls and displays for the brushes, suction, eco!efficiency mode and fresh water switches. Ergonomic and clear design. The water quantity adjustment is also easy to access.

#### 4 Easy storage and transport

Equipment storage space is always tight. The steering column of the BR 35/12 C folds up quickly and easily, opening up some completely new possibilities, like transportation by vehicle.

#### 5 The next level of efficiency

The unique Kärcher eco!efficiency mode is a milestone on the path towards sustainability: it utilises energy and resources intelligently. Power is no longer needed in stand-by mode, reducing CO<sub>2</sub> emissions. Water consumption is reduced, producing less waste water. At the same time, the run time is extended, the noise level is reduced and significant time is saved.

eco!efficiency

# You have to experience it yourself.

Unique driving experiences can only be assessed from behind the wheel. Time to take the new BR 35/12 C for a test drive. Now available from your local Kärcher distributor.

## Technical data

Brush working width	mm	350
Vacuum working width	mm	450
Area performance	m <sup>2</sup> /h	1,400
Intake performance	W	500
Fresh water/waste water tank	l	12/12
Brush contact pressure	g/cm <sup>2</sup>	150
Brush speed	rpm	700–1,500
Battery	V/Ah	25.2/21
Charging Voltage	V	220–240
Charging Frequency	Hz	50–60
Weight	kg	35
Dimensions (L x W x H)	mm	450 x 1,000 x 1,300

## Features

Roller brush	■
2-tank system	■
Mains operation	–
Battery and charger included	■
Variable contact pressure	■
Transport wheels	■
Order number	1.783-450.0

■ Included in delivery.

## Accessories

	Order No.	Description
Brush, white	4.037-036.0	soft
Brush, red	4.037-031.0	medium, standard
Brush, orange	4.037-037.0	high/low
Brush, green	4.037-038.0	hard
Brush, black	4.037-039.0	very hard
Pad roller shaft	4.762-009.0	
Roller pads on sleeve, yellow	6.369-053.0	soft
Roller pads on sleeve, red	6.369-047.0	medium
Roller pads on sleeve, green	6.369-052.0	hard
Microfibre roller	4.037-040.0	
Suction lip set, standard	4.037-035.0	oil-resistant, polyurethane
Filling aid	6.680-124.0	

#### Perfect means simple and clean

The fresh water distributor strip of the BR 35/12 C is easy to access and easy to clean. And it is impossible to remount the suction lip incorrectly when changing it.

#### Performance is all a matter of setting

Depending on the floor texture and the task at hand, the contact pressure of the BR 35/12 C can be adjusted in four steps. The machine's handling is adjusted accordingly: the higher the contact pressure, the faster the feed.

#### Brush replacement made easy

The BR 35/12 C's brush can be replaced with no tools at all in a matter of seconds, making it easy to always fit the right brush for the job or to replace a worn brush. Saving lots of time, every time. And that adds up.

#### Quality, piece by piece

Good ideas deserve high-quality implementation. The high-quality workmanship of the BR 35/12 C is apparent from the first glance. Each individual part is stress tested, as is the fully-assembled machine. We also ensure that it operates quietly.

#### Colour trends for safe operation

Yellow controls indicate operator contact points. Grey panels highlight service points. The standardised Kärcher colour coding eliminates any confusion and possible oversights.

#### Quick disposal

The dirty water tank of the BR 35/12 C is easy to detach and can be emptied in practically any available drain.
